**DETAILED ACTION**

***Information Disclosure Statement***

1. The information disclosure statement filed 02-24-04 has been considered.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claim 10 recites the limitation "the security row" in line 6. There is insufficient antecedent basis for this limitation in the claim.
4. Claim 14 recites the limitation "said lockbit sense amplifier" in lines 1-2. There is insufficient antecedent basis for this limitation in the claim.

Claims 11-14 are also rejected for depending on and including the limitations of claim 10.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Usami et al. (U.S. Patent 6,076,149).

Regarding claim 10, Usami discloses a method of operating an embedded semiconductor memory (memories 51, 52 embedded in MCU chip 2) comprising: having security lock protection responsive an external access request to said memory (column 5); and disabling external access to a memory array row whenever a security bit (2-bit security bit; column 4, line27) in the security row indicates locked status, and otherwise enabling access to the memory array (with A=1 and B=1; column 5, lines 46-53).

Regarding claim 11, Usami discloses in figure 2 that internal access (such as R/W) is enabled regardless of locked/unlocked status.

***Allowable Subject Matter***

7. Claims 1-9 are allowed.
8. Claims 12-14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
9. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or suggest at least the limitation of claim 12 which includes erasing memory contents of the memory prior to resetting security row memory cell elements and lock bit cells to an unlocked status.

**Conclusion**

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brownlee, Paul M. et al. (U.S. Patent 5,642,480) teach security bit employed to grant access to a memory array.
